

Master Lock Company is determined to help sustain a lower carbon footprint by adhering to manufacturing processes that benefit more than just our bottom line.

We understand the importance of the people who produce and use our safety products, the communities where we live and operate, and the commitment to implementing green initiatives.

Master
SAFETY SERIES™ Lock®

CLEAN. ACCOUNTABLE. RESOURCE CONSCIOUS.

Incorporating green initiatives into our cohesive manufacturing process is an integral part of our business model.

Reduce:

Our Safety Series™ Zenex™ thermoplastic padlock bodies are molded using a hot runner injection molding process that results in virtually no scrap material.

This reduces waste.

Reuse:

Precision engineering, durable materials and simple recommended padlock maintenance makes all Master Lock Safety Series padlocks endure repeated use.

This reusable solution promotes a greener environment.

Recycle:

Master Lock Safety Series padlocks use a high percentage of recycled materials in our Milwaukee, WI manufacturing plant. 100% of all metal material remaining after precision machining padlocks is recycled. Our Aluminum Safety Series padlocks are machined from 50% recycled material.

Steel shackles, brass keys and key cylinders are made of 100% recycled material.

All of these initiatives can result in a smaller carbon footprint for Master Lock and our customers.

DOING OUR PART & PROMOTING BUSINESS RESPONSIBILITY

We care about reducing environmental pollution and are dedicated to minimizing its effects by implementing green initiatives in our Milwaukee manufacturing plant. These initiatives include:

FDA approved lubricants

Optimized manufacturing processes

PVC free padlocks and hasps

Clean waste water treatment

Locally sourced component manufacturing and reduced transportation

Durable products for extended use

Recycled raw materials

Non-polluting water return

Recyclable packaging

Manufactured with both consumer and worker health and safety in mind

Master Lock is committed to stewardship for the environment, the people, the products and the communities where they are produced and used.
